

Service Manual

(Model: PU-1680A/PU1681A)

(Model: EU-1151A)

LW/MW/FM Cassette

Model **PU-1680A**

PU-1681A

Model **EU-1151A**

SPECIFICATIONS

Radio section

Model: PU-1680A

Tuning system: PLL frequency synthesizer system
Receiving range: FM 87.7 to 107.9MHz (0.2 MHz steps)
AM 530 to 1710kHz (10 kHz steps)

Model: PU-1681A

Tuning system: PLL synthesizer tuner
Receiving range: FM 87.5 to 108MHz (0.1 MHz steps for seek)
(0.05 MHz steps for manual tuning)
LW 153 to 279 kHz (3 kHz steps)
MW 531 to 1,602 kHz (9kHz steps)

Tape section

Reproducing system: 4 track, 2 channel stereo cassette
Wow and flutter: Less than 0.25% (W.R.M.S.)
Separation: More than 35dB
Crosstalk: More than 40dB
S/N ratio: More than 45dB
FF/REW time: Less than 120sec. (c-60)

General

Power supply voltage: DC 13.5V (10.8 to 15.6V allowable)
Negative ground
Current consumption: Less than 10A
Speaker impedance: 4Ω
Dimensions (mm): 178 (W) x 100 (H) x 152 (M)mm
Weight: 1.5kg

NOTE

1. We cannot supply PWB with component parts in principle. When a circuit on PWB has failure, please repair it by component parts base. Parts which are not mentioned in service manual are not supplied.

COMPONENTS

PU1680A/PU1681A/EU1181A

Main unit		1
Mounting bracket	300-7742-20	1
Part's bag		
Removal key	331-2479-20	2
Poly Bag	253-0380-50	1

■ To engineers in charge of repair or inspection of our products.

Before repair or inspection, make sure to follow the instructions so that customers and Engineers in charge of repair or inspection can avoid suffering any risk or injury.

1. Use specified parts.

The system uses parts with special safety features against fire and voltage. Use only parts with equivalent characteristics when replacing them.

The use of unspecified parts shall be regarded as re-modeling for which we shall not be liable. The onus of product liability (PL) shall not be our responsibility in cases where an accident or failure is as a result of unspecified parts being used.

2. Place the parts and wiring back in their original positions after replacement or re-wiring.

For proper circuit construction, use of insulation tubes, bonding, gaps to PWB, etc, is involved. The wiring connection and routing to the PWB are specially planned using clamps to keep away from heated and high voltage parts. Ensure that they are placed back in their original positions after repair or inspection.

If extended damage is caused due to negligence during repair, the legal responsibility shall be with the repairing company.

3. Check for safety after repair.

Check that the screws, parts and wires are put back securely in their original position after repair. Ensure for safety reasons there is no possibility of secondary problems around the repaired spots.

If extended damage is caused due to negligence of repair, the legal responsibility shall be with the repairing company.

4. Caution in removal and making wiring connection to the parts for the automobile.

Disconnect the battery terminal after turning the ignition key off. If wrong wiring connections are made with the battery connected, a short circuit and/or fire may occur. If extensive damage is caused due to negligence of repair, the legal responsibility shall be with the repairing company.

5. Cautions regarding chips.

Do not reuse removed chips even when no abnormality is observed in their appearance. Always replace them with new ones. (The chip parts include resistors, capacitors, diodes, transistors, etc). The negative pole of tantalum capacitors is highly susceptible to heat, so use special care when replacing them and check the operation afterwards.

6. Cautions in handling flexible PWB.

Before working with a soldering iron, make sure that the iron tip temperature is around 270°C. Take care not to apply the iron tip repeatedly (more than three times) to the same patterns. Also take care not to apply the tip with force.

7. Turn the unit OFF during disassembly and parts replacement. Recheck all work before you apply power to the unit.

■ ADJUSTMENT

Item	Procedure	Instrument
FM-S-meter	1. Press the RDS button and M6 button to RDS test mode. 2. Input at 98.1MHz/30dBμ (1KHz, 30% Mod.) signal. 3. Adjust VR on top of tuner pack so that an output level at the TP (S-Meter) on main PWB is $3.0 \pm 0.1V$.	SSG Millivoltmeter

Terminal Description

Pin No	Symbol	I/O	Function
1	LCD-DO	O	Serial data output Display IC
2	LCD-CLK	O	Clock pulse output to Display IC
3	LCD-CE	O	Chip enable signal output to Display IC
4	RDS DATA	I	RDS serial data input
5	NOISE CLEAR	O	Noise clear signal output
6	RDS MUTE	O	"H" RDS mute ON
7	FM-SD	I	"H"=FM station detected
8	AM-SD	I	"H"=AM station detected
9	VDD	—	Positive supply voltage
10	X2	—	Crystal connection (12MHz)
11	X1	I	Crystal connection (12MHz)
12	VSS	—	Ground
13	XT 2	—	Not in use
14	XT 1	I	Not in use
15	RESET	I	Reset signal input. "L"=Reset
16	N.C	I	Not in use
17	N.C	I	Not in use
18	RDS-CLK	I	RDS clock pulse input
19	KI-0	I	Key scan signal input. Ref. Table 1
20	B/U-DET	I	Backup interrupt signal input. "H"=Backup ON
21	ACC-DET	I	ACC power supply ON signal input. "L"=ACC ON
22	PACK-IN	I	Cassette pack insertion detection terminal. "L"=Tape in
23	AVDD	—	Positive supply voltage
24	AVREF0	—	Reference voltage input for A/D converter
25	NOISE-IN1	I	Input terminal of A/D converter to detect the noise of FM
26	NOISE-IN2	I	Not in use
27	S-M	I	Input terminal of internal A/D converter to detect the voltage of FM S meter
28	N.C	I	Not in use
29	PLL-DI	I	PLL serial data input
30	REMCON-1	I	Input terminal of internal A/D converter to detect the remote control switch
31	REMCON-2	I	Input terminal of internal A/D converter to detect the remote control switch
32	MUTE-DET	I	Input terminal of A/D converter to detect the voltage of Backup line
33	AVSS	—	Ground
34	INTERCOMINT	I	Input terminal for Intercom interruption. "H"=Interrupt ON
35	N.C	I	Not in use

Pin No	Symbol	I/O	Function
36	AVREF	—	Connect to VDD
37	PLL-DO	O	Serial data output to PLL IC
38	PLL-CLK	O	Clock pulse output to PLL IC
39	N.C	O	Not in use
40	PLL-CE	O	Chip enable signal output to PLL IC
41	SOFT-MUTE	O	Output terminal for swithing FM SOFT MUTE constant
42	A-MUTE	O	Mute signal output to Audio power amplifier IC. "L"=Mute ON
43	L-MUTE	O	Mute signal output to line-out. "L"=mute ON
44	N.C	I	Not in use
45	V-CL	O	Clock pulse output to electrical volume IC
46	V-DO	O	Serial data output to electrical volume IC
47	V-CE	O	Chip enable output to electrical volume IC
48	VOL-MUTE	O	Mute signal output to electrical volume IC
49	5V-REM	O	5V power supply circuit control signal output. "L"=ON
50	14V-REM	O	14V power supply control signal output. "H"=ON
51	FWD/REV	I	"H"=Reverse. "L"=Forward
52	N.C	I	Not in use
53	N.C	I	Not in use
